

ENEROMATE

powered by ENRAMS

AUTOMATIC VOLTAGE REGULATOR | ABOUT

Voltage regulation is a mature, efficient and cost effective technological response to rising energy costs. **EnergyMate** allows commercial and industrial enterprises to take greater control of their electrical consumption, power quality, energy cost and greenhouse emissions.

EnergyMate responds instantly to changes in power supply and demand. Managing each phase independently the technology provides advanced control and regulation of the power delivered to plant and equipment.

ENEROMATE™

powered by ENRAMS

AUTOMATIC VOLTAGE REGULATOR | FEATURES

reduces electrical energy consumption by 10% or more ✓

failsafe system ✓

delivers quality stable power at the set voltage ✓

built in surge protection ✓

enhances lifespan and performance of equipment ✓

minimal maintenance requirements ✓

reduces carbon emissions ✓

Complies with AN/NZS 61000-6-3:2012 (Ctick),
and AS/NZS 3820:2009 Essential safety requirements ✓
